REASONS FOR ALLOWANCE

Applicant's arguments, see Remarks (pages 1 – 3), filed 12/22/05, with respect to Claim 1 have been fully considered and are persuasive. The rejection of Claim 1 has been withdrawn.

Applicant argues that Kameda et al. (U.S. 5,195,577) teach of an apparatus that is unrelated to the present invention because it uses an aqueous solution that freezes at temperatures much higher than those claimed in Claim 1. This argument is persuasive.

Applicant argues that the prior art of Kameda et al. cannot be properly combined with Kondo et al. (U.S. 4,824,454) because Kameda et al. disclose of apparatus that cools semiconductor switching elements without the use of a refrigerator and Kondo et al. do. This argument is persuasive.

Applicant argues that the prior art of Brodbeck et al. (U.S. 4,592,205) and Yanai et al. (U.S. 5,327,729) cannot be properly combined with Kondo et al. Applicant further argues that Brodbeck et al. disclose of an apparatus that delivers liquid cryogen to a container, which does not correspond to a cryostat as disclosed in Kondo et al. Applicant further argues that the apparatus disclosed in Yanai et al. is entirely unrelated to the apparatus disclosed in Kondo et al. Both of these arguments are persuasive.

The following is an examiner's statement of reasons for allowance:

- The combined prior art of Kondo et al. in view of Kameda et al., Brodbeck et al. and Yanai et al. does not properly teach nor suggest of the limitations recited in Claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
